

### 51528B

#### LTCC

##### Description

51528B is a premixed lead free blue LTCC powder designed for tape application which allows the production of high performance components and multilayer circuits. 51528B is compatible with binder systems typically used in tape fabrication. In tape form this material is also compatible with Heraeus silver and gold conductor systems.

##### Typical Properties

Metal

None

##### Key Features

- Relatively low dielectric loss
- Plating bath resistance, hence, particularly suitable for high performance component manufacture
- In tape form this material is also compatible with Heraeus silver and gold conductor systems
